Skin PREP

It is all in the skin prep!
No matter your skin type, moisturizing
& priming the skin several days before your session
is essential for an even looking make-up application. This will
ensure your makeup will stay smooth, and wear longer
throughout the day and even into the evening - so book
a night out after your session!

A well moisturized face allows your skin underneath
your make-up to look less dull and prevents foundation
from looking "cakey."

Professional Hair & Make-up

THIS ISN'T YOUR TYPICAL PHOTO SHOOT. Each session is artfully guided by the MJCollins Photography team to capture the naturally beautiful woman you are.

This is YOUR day to be pampered and spoiled. We can photograph you the way you've always dreamed about. Natural, light, smokey or Hollywood: the look is entirely up to you
